Introduction

Supported Flyingvoice IP Phone Models: FIP10(P), FIP11C(P), FIP13G, FIP14G, FIP15G, FIP16

Note:

Phone and VoIP PBX in this guide based on current version. If you use other models or the firmware version is different, there will be some differences on configuration interface and functions.

This guide is used to provision phones and VoIP PBX which are restored to default settings. If you're not sure whether they have been configured, please reset your phones and VoIP PBX to the default configuration first.

Register phone to 3CX PBX

1.1 PBX Configuration

This guide takes Cloud PBX as an example.

- 1. Make sure the computer can connect to the Internet.
- 2. Open web browser and input 3CX administrator address: https://183.46.60.18:5001

3. Enter username (Default: admin) and password (Default: password) to log in the administrator page.

4. Click "Extensions" on the left → "Add". Set extension and password in general setting.

1.2 Phone Configuration

This guide takes FIP11C as an example.

1. Connect the phone to intranet and plug in power cord, then the phone will be started. It will obtain IP address from DHCP server automatically during startup. You can find the IP address information by pressing the "**OK**" button on phone.

The IP address of the phone in this example: 192.168.20.76

The IP address of 3CX PBX: 183.46.60.18

2. Open the browser on the computer and input the IP address of the phone: http://192.168.20.76

3. Enter username (Default: admin) and password (Default: admin) to log in the administrator page.
