Introduction

Supported Flyingvoice IP Phone Models: FIP10(P), FIP11C(P), FIP13G, FIP14G, FIP15G, FIP16 Supported New Rock VoIP PBX Models: OM20, OM50, OM80E, OM200G

Note:

Phone and VoIP PBX in this guide based on current version. If you use other models or the firmware version is different, there will be some differences on configuration interface and functions.

This guide is used to provision phones and VoIP PBX which are restored to default settings. If you're not sure whether they have been configured, please reset your phones and VoIP PBX to the default configuration first.

Register phone to New Rock PBX

1.1 PBX Configuration

This guide takes New Rock OM20 as an example.

1. Connect the computer and OM20 to the same network. In this example, the network address of computer, phone and OM20 is 192.168.20.0/24

2. Open web browser and input OM20 IP address: https://192.168.20.166

There are two ways to find OM20 address:

① Dial ## to obtain device IP address by an analog phone.

2 Obtain device IP address via "Finder" software.

3. Enter default password to log in the administrator page. You can find the default password on the rear label of OM20. (Example: pGgV8ZKK)

4. Click "Extensions" \rightarrow "IP" \rightarrow "+ IP phone", "+ Quick Addition" or "+ Batch adding". Here takes Batch Adding as an example.

5. Input Starting line, Extension number (Begin), Quantity, Password, Registrar password and other parameters. Then click "**OK**" button.

+ IP p	hone	+ Mobile WeWei 4 Quick Addit	on 🛛 🕂 Batch adding	Batch configuration	🗑 Delete	Registrar OPTIONS		xt. number	Q
	ID	Batch adding					×	1 Delete S	ietting
	1								0

	4	Quantity	8					1	Ø
	5	Password	O Randomly generate	ed 💿 Same password				1	Ø
	6	Registrar password	12345678						Ø
	7	IP address for IP trusted							Ø
-	-	authentication	· · · · · · · · · · · · · · · · · · ·					-	^
				Ok Cancel					

Starting line (Required field): There are 1-20 optional lines. (Example:1)

Extension number (Begin) (Required field): The first extension number of batch adding extension numbers.

Quantity (Required field): The number of extensions created. (Example: 8)

Password (Required field): Select randomly generated or same password. Randomly generated password needs to be specified. You can find randomly generated password on IP extension page. Here takes same password as an example.

Registrar Password (Required field): The password of Extension. (Example: 12345678)

Concurrent Registrations: The maximum number of terminals allowed to register this extension, the default number is 1 and the maximum number is 5.

IP address of IP authentication: Leave it blank by default.

1.2 Phone Configuration

This guide takes FIP11C as an example.

1. Connect the phone to intranet and plug in power cord, then the phone will be started. It will obtain IP address from DHCP server automatically during startup. You can find the IP address information by pressing the "OK" button on phone.

The IP address of the phone in this example: 192.168.20.76

The server IP address of OM20: 192.168.20.166

2. Open the browser on the computer and input the IP address of the phone: http://192.168.20.76

3. Enter username (Default: admin) and password (Default: admin) to log in the administrator page.

$\leftarrow \ \rightarrow \ \mathbb{O}$	ଜ	① 192.168.20.76/index.asp					
		VoIP control panel					
		Username Password	admin •••••				

4. Click"**VOIP**"---"**Line 1**", then set up the phone with registered info as follows:
